SUMMARY

Cybersecurity enthusiast and B.Tech student with a strong passion for securing digital systems and solving real-world security challenges. Experienced in ethical hacking, penetration testing, and web application security, with hands-on expertise in Kali Linux, Burp Suite, Nmap, Python, Flask, React, and Node.js. Developed security-focused applications, including an OWASP-based vulnerability scanner and a secure file upload system with advanced threat detection. Committed to continuous learning, security research, and building innovative solutions that strengthen cybersecurity resilience.

EDUCATION

Presidency University

B.Tech in CSE (Cyber Security), CGPA: 7.10

Bangalore, Karnataka

Aug. 2023 – July 2027

Siddaganga PU College

PUC, Percentage: 79.33

Davanagere, Karnataka

July 2020 – May 2022

Sadhana Eng Med High School Holalu

X, Percentage: 81.46

Vijayanagara, Karnataka

June 2019 – Mar 2020

PROJECTS

QuantumVault – Secure Cryptographic Data Sharing | *Python, Flask, PostgreSQL, HTML, CSS, JavaScript*

- Developed a secure web application for encrypted text and file sharing using Fernet cryptography.
- Implemented user authentication, encrypted data storage, and QRC Code-based secure retrieval for controlled decryption.
- Designed a responsive Glassmorphism interface using HTML, CSS, and JavaScript for an intuitive user experience
- Implemented secure file upload/download with role-based access control and end-to-end encrypted data management for authorized users.

DriveEase – Premium Car Rental Platform | *Node.js – Express.js, PostgreSQL, HTML, CSS, JavaScript, Bootstrap*

- Developed a full-stack car rental platform with dedicated Customer, Vendor, and Admin portals.
- Implemented vehicle listings, real-time booking, secure authentication, and document uploads
- Integrated PostgreSQL for persistent data storage and Multer for secure file uploads.
- Built an admin dashboard for user verification, analytics, and booking management.

Web Vulnerability Dashboard | *React, Flask, Python, SQLite*

- Built a full-stack web security scanner performing 6 automated vulnerability checks (XSS, SQL injection, SSL/TLS, security headers, sensitive paths, cookie security) on target URLs
- Designed a 0–100 risk-scoring algorithm based on OWASP severity weighting to rank findings by Critical/High/Medium/Low
- Built an interactive React dashboard with charts, scan history, and step-by-step remediation guidance for each finding
- Implemented a Flask REST API with SQLite storage to persist scan results and history

TECHNICAL SKILLS

Languages: Java, Python, C/C++, SQL, HTML/CSS

Frameworks: React, Node.js

Developer Tools: Git, Docker, VS Code, PyCharm

Operating Systems: Windows, Linux (Kali Linux)

CERTIFICATIONS & ACHIEVEMENTS

Cybersecurity Professional Certificate – Google (2026)

Certified Ethical Hacking & Penetration Testing – Cappriciosec University

Web Technology Internship – AICTE + SkillCraft Technology

Basics of C Programming – BALC

Advent of Cyber 2025 – TryHackMe
